

Impotence, Infertility and the Harmony Chip.

Although this is normally perceived to be a problem exclusive to men, this is not at all the case. It affects just as many women! The only difference is that when a man can't get an erection then nothing can happen. When a woman doesn't get erect, i.e. when her vagina remains dry, then she can buy a gel from the drug store to artificially lubricate.

There are here, three causes present all contributing to this unpleasant problem. The Harmony Chip can help with all three!

It is not so that all three contributory factors are present in all cases. It is, however, so common that it usually pays to act as though all are. These are not listed in order of importance; all are important and it is seldom possible to remove the problem without tackling all three causes!

- 1) Inappropriate diet, especially the consumption of beef which can cause a thickening of the blood vessels in the groin making it physically impossible for either the penis or the clitoris to become erect. Additionally, the consumption of dairy produce, especially from cows milk, will "glue up" these sensitive organs and will, amongst other things, cause women to be "dry". Cows milk and produce therefrom is the cause of about 60% of infertility in women. Dairy produce will, in both sexes, numb the feelings essential for the erectile process. Sugar (not a foodstuff but a naturally occurring pesticide) can also directly cause feelings of impotence. A free guide to human appropriate nutrition can be downloaded at <http://www.hu.nutritionpdf.getinharmony.com>

- 2) What is also extremely useful is to speed up the detoxification of the body. Without this assistance, it could take a year or more for the erectile tissues to begin functioning again. As with arthritis, arteriosclerosis and a whole host of similar problems where, just as with

impotence, the problem is that the body cannot properly detoxify itself, the Harmony Chip has proven itself to be the only universally effective solution. The revitalisation of the blood which the Harmony Chip brings will change this year or more to a few weeks (well within the guarantee period).

- 3) Suppressed, learned, guilt feelings about sex. These will often cause a failure of the erectile reflex in both men and women. Our society is filled with this nonsense from two different directions:

The "church" teachings that sex is a "sin", i.e. God made a mistake when "he" gave us this most beautiful way to share each other. Actually, the origin of this perversion is the convention of bishops in Constantinople in 320 AD where it was decided to go for political power by, amongst other things, "licensing" love and sex.

The advertising "teaching" that, unless you are a sun-bronzed Hercules or Venus, you are sexually inadequate. The truth is that most women find such men and most men find such women unattractive because they are often so egocentric and devoid of normal human feelings because of their "perfect" bodies that they almost cease to be people.

The Harmony Chip, especially the Harmony Headphones <http://www.hu.headphone.getinharmony.com> will very rapidly dissolve this "programming" and free you up to just enjoy being your wonderful self exactly as you are.

- 4) Your partner's belief or fear that they are not good enough for you.

Sex is an activity which takes place primarily in the area of feelings. If your partner fears that you will leave them / that they shouldn't have you / he or she is not good enough for you or similar nonsense then he/she will automatically draw themselves back preparatory to being abandoned. It's

not what he/she wants, of course, it's what he/she fears. This pulling back will cause both a great weakening of the erectile process in both men and women as well as "premature ejaculation".

Once again, the Harmony Chip will correct this programming, especially if the Harmony Headphones are used. Both partners can use the same Harmony Headphones without problem.

The optimal application of the Harmony Chips in a relationship is that both partners use the Harmony Headphones for 30 - 60 minutes each day together with the training programme which comes free with every Harmony Headphones order. Then the remainder of each day (24/7) each should wear a Harmony Chip upon either the thymus gland, the "heart chakra", the lower abdomen or (especially by infertility) the ming-meng point. To heal your relationship, you do not need more than 3 Harmony Chips unless there is very strong electro smog where you live. See: <http://www.hu.es.getinharmony.com>

The Harmony Chips come complete with all necessary instructions, a 3 month, 100% money back satisfaction guarantee and a 10 year functionality guarantee.
